

Mission & Philosophy of Education

Mission

Our primary role is to continuously form our students through a Catholic program of education committed to a standard of excellence.

We help students to develop their spiritual, moral, intellectual, social, emotional, and physical abilities within a community dedicated to living the gospel.

In cooperation with the family, we help students to form character, so they will accept responsibility to fulfill their personal potential and learn to share their gifts through love for all.

Philosophy of Education

We believe that each child is loved by God and uniquely created for a sublime purpose. Therefore, we must help our students to love God and neighbor with a whole heart; to think, judge, and act with right reason; and to use their education to better embrace Catholic teachings and the example of Christ.

To accomplish this aim the school strives to create a Christian atmosphere of care and concern in which all children may grow toward their full potential spiritually, morally, intellectually, socially, emotionally, and physically. The very nature of the child requires a coordinated education which is the product of a cooperative effort by home, church, and school. It is through this harmonious partnership that the aim of Catholic education is achieved.

We believe that ... [The] effective Catholic School must call its pupils to the conviction that people are more important than material gain that justice is more important than success that love is more important than esteem, and that collaboration unites while competition divides. The truly successful Catholic School student is not necessarily one who is successful in every endeavor, but one who accepts Christian responsibility for fulfillment of personal potential and shares these gifts with others.
